

## Management/Accounts

### Output Reports

Payment reports and data files for multiple payment methods including international transfers and split payments.

Payslip reports for printing and distribution.

On-line payslips for direct access by employees.

Fully consolidated reports encompassing all payrolls over any date range.

Detailed breakdown by payroll element, organisational unit or reference, GL accounting code or other user defined groupings.

Data outputs to accounting, ERP or BI systems.

### Gross to Net Check

Complete, consistent and detailed reporting of payroll output.

Breakdown of all payroll elements per employee by payroll, including % and variance reporting against previous period and hourly/daily/unit pay analysis.

### Process Control

Clear reporting and output of validated payroll data and instructions specific to the client process for each payroll.

Verification and exceptions reporting to highlight discrepancies between checked input and output.

### Check Input

Central and categorical reporting of all payroll changes.

Validation and exceptions reporting against data requirements.
